19	Atacapi 5	Yes	21,976	22.0	Expert Report	TEXACO

* TPHs are Total Petroleum Hydrocarbons, which contain benzene, a Group 1 carcinogen – the same classification as asbestos or arsenic – among various other toxic chemicals.

** When indexed against Ecuadorian legal standard of 1,000 mg/Kg. By U.S. standards, the magnitude would be greater by a factor of ten.

*** There are always multiple pits surrounding the same well site. More than one result from the same site – such as Shushufindi 4 -- reflects sampling from different waste pits at the site.
